

Continuous Improvement

Leverage Accelerera's expertise to fill skills, resource and time gaps, so your team can focus on core business and continuous innovation.

Could your Engineering team do with more time and resources?

Accelerera's Continuous Improvement service provides you with expertise dedicated to completing a backlog of tasks and activities.

- Remove the distraction of BAU tasks.
- Align our experts with in-flight projects for additional support and insight.
- Improve processes and best-practice under the guidance of an Accelerera expert.
- Up-skill your team, leveraging Accelerera's experienced specialists' knowledge by filling in knowledge gaps with an experienced Accelerera specialist.
- Grow with confidence, having Accelerera's Cloud, Security, and Container expertise within arm's reach.

How does it work?

- Dedicated hours and a pre-approved backlog of tasks are agreed at the start of the engagement.
- A specialist Engineer will be assigned to work on the backlog of items.
- Communication and project collaboration tools will be leveraged to ensure engagement and visibility.
- The task list will be reviewed fortnightly to ensure it is aligned and prioritised against requirements.

Dedicated Accelerera technical expertise to support your teams with:

Development of **processes** and **documentation**

Integration and **configuration** of systems.

CI/CD pipeline design and augmentation

Cloud, Security, DevSecOps & Cloud-Native requirements

Get the best out of the Continuous Improvement service:

- An Accelerera Engineer will be assigned for a minimum of half a day per week.
- dedicated days and times can be set (during business hours), flexibility is available.
- The backlog of tasks can be changed and agreed at the end of each two-week sprint, providing agility for your changing business needs.
- Additional hours can be purchased as required.
- A minimum 6 month contract is required.
