Accelera

Secure Container Platform

Cloud Native Secure Container Orchestration powered by Terraform Cloud for Business. Designed for rapid innovation with security best-practice baked in.

Currently using or planning to use Containers?

Leverage the benefits of a secure Container Orchestration platform. Scale your containers with ease, improve governance and security controls, and better manage and monitor your environment.

Accelera's Secure Container Platform, combines the power of Terraform Cloud for Business and AWS EKS, with Accelera's knowledge of best-practice design and experience in Secure Cloud Native services, to provide you with a purpose-built and optimised, out of the box solution.

Accelera Secure Container Platform

Out of the box:

- AWS Landing Zone
- Terraform Cloud for Business / Sentinel policy as code
- GitHub or Bitbucket Integration
- 2 x AWS EKS Clusters
- Optimised for Security and Agility
- Design Document

Additional Services:

Need more help with deploying and maintaining containers on EKS? Talk to us about how we can help with this and other services.
